

PSE on bainbridge island

PSE Bainbridge - The Route Explorer is now available!

Learn about route options for the "Missing Link" Project and share your feedback!

We're launching our second feedback period for the Murden Cove - Winslow Transmission Line Project! We're continuing to develop the "Missing Link" Project by sharing five route options that could connect Murden Cove and Winslow substations. Visit our [online open house](#) by June 2 to learn about the routes under consideration, interact with the Route Explorer, and share your feedback.

Background

As one part of our solution to improve electric reliability on Bainbridge Island, we're planning to build the ["missing link" transmission line](#) between the Murden Cove and Winslow substations. The new power line will create a transmission "loop", which means all substations will be connected to two transmission lines. If one line to a substation experiences a power outage, the other line can still feed the substation and provide power to customers.
