

PSE on bainbridge island

PSE Bainbridge - Jan. 21 Online Community Workshop

There's still time to RSVP for the "missing link" transmission community workshop!

As one part of our solution to improve electric reliability on Bainbridge Island, we're planning to build the ["missing link" transmission line](#) between the Murden Cove and Winslow substations. The new power line will create a transmission "loop", which means all substations will be connected to two transmission lines. If one line to a substation experiences a power outage, the other line can still feed the substation and provide power to customers.

Join us for an online community workshop

Thursday, Jan. 21, 5:00 – 7:30 p.m.

You can RSVP at any point before or during the meeting time to join the workshop.

[Subscribe](#)[Past Issues](#)[Translate ▼](#)

We'll be sharing information about the need for the project, the routing process, and seeking your feedback on the route segments under consideration. We'll also launch an interactive, online Segment Explorer tool that allows the community to review and provide feedback on route segments.

Learn more about the project: psebainbridge.participate.online

Please let us know if you're facing barriers to participation and need accommodations to participate fully in the Jan. 21 workshop, or to access the online Segment Explorer. If requesting accommodations for the Jan. 21 workshop, please reach out by Jan. 19 so we may accommodate your request.

Take a closer look at route segments and share feedback until Feb. 12

Visit our [online open house](#) by Feb. 12 to share your feedback and engage with the interactive Segment Explorer. The Segment Explorer will be available after the online community workshop on Jan. 21. By visiting this page you'll also be able to review the project study area map, learn about the project, and how we're engaging with the community to implement this solution.
