

Eagle Harbor area electric system upgrades

May 15, 2016

Dear PSE Customer,

In an ongoing effort to deliver safe and reliable energy to you and your neighbors, Puget Sound Energy will be installing a section of underground electric cable to improve electric service reliability in the Eagle Harbor neighborhood. The new section of cable will connect to two existing overhead power lines in the area, allowing PSE to continue to serve customers with electricity in the event of a power outage on one of the lines.

This work will entail installing underground electric cable and conduit, as well as installing two new overhead power poles at the transition points between the new underground cable and existing overhead power lines. We are committed to completing our work safely and efficiently, and our crews will do their best to reduce impacts to nearby neighbors. Please see below for project details.

Work details

- Who:** Electric crews from PSE and Potelco, tree crews from Asplundh
What: Installing underground electric cable, conduit, and two new power poles
When: Work is expected to begin in early June, and standard work hours are from 7 a.m. to 4 p.m. There is approximately six months of work, which may be done intermittently over the course of the year
Where: Along portions of Finch Road Northeast, Wyatt Way Northwest and Eagle Harbor Drive Northeast. Trenching will be done on the road and shoulder in most areas (see map on reverse)

What you can expect

- Prior to electrical work beginning, our tree trimming partner, Asplundh, will be trimming trees and brush along the project route as necessary.
- To ensure the safety of the public and our crews, lanes of traffic will be closed as necessary while construction is occurring. Traffic control flaggers will guide vehicles through the work zone. More details on traffic impacts will be posted on the project webpage: pse.com/bainbridge
- There will likely be noise from trucks and heavy machinery
- **Some customers may experience a short, temporary power outage during this time.** We will notify impacted customers prior to beginning work requiring an interruption in electric service

We are proud to serve in your community and aim to complete the work with as little disruption as possible. Thank you for your patience as we work to complete this project. If you have any concerns or questions, please contact me at the phone number or email below and reference project #101085553. You can also visit the project webpage at pse.com/bainbridge.

Sincerely,

Kelley O'Brien | Project Manager
