Northeast Day Road electric system upgrade

July 1, 2016

In an ongoing effort to deliver safe, dependable and efficient energy, Puget Sound Energy will be in the Northeast Day Road area to upgrade the existing overhead electric distribution system. This work will entail reconfiguring a portion of the overhead power lines in a way that reduces their exposure to falling tree branches, as well as installing tree wire and replacing nine utility poles. Our crews will do their best to reduce impacts to nearby neighbors. However, there may be some noise and traffic impacts, and **some customers may experience a temporary interruption of power as part of this work.**

Project details

- Who:** Tree crews from Asplundh and Electric crews from PSE and Potelco
- What:** Reconfiguring overhead electric lines, adding tree wire, and replacing nine utility poles
- When:** Anticipated to start mid- July and expected to be approximately two months of work
- Project duration could vary based on weather and crew assignments
 - Work hours are typically Monday through Friday, 8 a.m. to 5 p.m.
- Where:** Northeast Day Road between Highway 305 and North Madison Avenue Northeast, Bainbridge Island (see project map on back)

What is tree wire?

Tree wire is a specially coated, overhead wire that's designed to prevent an electric short (and subsequent outage) when a tree limb falls into a power line. Where installed, it significantly reduces the frequency of tree-related outages, but cannot prevent all disruptions (e.g. if an entire tree falls into a power line).

What you can expect

- Prior to electrical work beginning, our tree trimming partner, Asplundh, will be trimming trees along the project areas as needed
- **Some customers may experience a temporary interruption of power during this time. We will notify those impacted customers ahead of time**
- Traffic control flaggers will guide vehicles through the work zone
- There will likely be noise from trucks and heavy machinery

We're proud to serve in your community. Thank you for your patience as we work to complete this project. If you have any questions or concerns, please contact me at the information below and reference project **#101091048**.
