Winslow Tap project update ▶▶▶

NE PAULANNA LN

## Fieldwork continuing along the Winslow Tap corridor through July 2020

You may have noticed PSE and our contractor crews conducting field surveys periodically since January. The project was temporarily paused due to the Governor's "Stay home, Stay healthy" order, and we're now able to resume this work. Please know that the safety of our customers, communities and employees is our number one priority. Crews will be maintaining social distancing while working in the field and we encourage our customers to do the same.

Crews work on weekdays between 8 a.m. and 5 p.m., and they will wear safety vests and carry identification at all times. We may occasionally require access through private property to reach certain sections of the line. Please let us know if you require advance notice - we'll reach out 24 hours in advance. Visit the project website for more information, or reach out to the project team with questions. Thanks for your patience while we complete this important work.
